

Firmenprofil

Versio.io is an enterprise software solution that provides a central asset & configuration repository for business and IT, detects their changes and processes them.

On this historized and topologized data treasure we offer automated solutions for enterprise customers:

- * Automation of documentation requirements
- * Inventory of IT infrastructure and application systems
- * Change detection and root cause analysis
- * Product release and end-of-life management
- * Identification of IT security vulnerabilities
- * Service delivery & operation insights
- * Automation of governance & compliance verification
- * Cost allocation of dynamically used resources and SLA penalties
- * Monitoring of business processes and batch jobs
